

EPA PUBLIC NOTICE

U.S. Environmental Protection Agency Reviews Cleanup at the FMC Dublin Road Superfund Site

The U.S. Environmental Protection Agency (EPA) is conducting its fourth five-year review of the implemented remedy at the **FMC Dublin Road Superfund Site**, located in the Townships of Ridgeway and Shelby, Orleans County, New York. This review seeks to confirm that the implemented remedy continues to protect human health and the environment. The last five-year review was conducted in September, 2010. A summary of the review and an evaluation of the protectiveness of the implemented remedies will be included the review.

What is a Five-Year Review?

The purpose of a five-year review is to ensure that implemented remedies at Superfund sites function as intended and continue to be protective of human health and the environment. These regular reviews, which are required by federal law when contaminants remain at a site, include:

- inspection of the site and cleanup technologies;
- review of monitoring data, operating data and maintenance records, and
- determination if any new regulatory requirements have been established since EPA's original cleanup decision was finalized.

When will the Five-Year Review Report be available?

It is anticipated that the five-year review report will be available at the website noted below in February 2020.

For more information

There are several ways to review information on this site. The Administrative Record, which includes the EPA decision documents used for selecting the cleanup plan, is available for public review at the information repository listed below. Project information is also available online at the website noted at the bottom of this page under 'Additional Documents'.
